

Abstract Topics

[Submit Your Abstract](#)

Themes and Topics

You will be asked to select one Theme. This selection is important because it will decide the particular session at which your poster will be displayed. Before selecting themes and topics, it is in your interest to ask yourself in which group of posters your contribution is likely to be viewed by the most interested participants.1) Nervous System Development and Related Disorders

2) Comparative Neuroscience and Evolution

3) Stem Cells, Organoids, Neural Injury Neurotoxicity and Repair

4) Neurons and Glia: Physiology and Inter-Cell Communication

5) Neuroimmunology

6) Neural Excitability, Synapses and Plasticity

7) Aging and Neurodegenerative Disorders

8) Diseases of The Nervous System (including, infective and psychiatric)

9) Motor and Sensory Systems10) Sleep, Biological Rhythms

11) Neuroendocrine Systems

12) Computational Neuroscience

13) Emotion, Memory and Cognition

14) Neuroethology

15) Transcriptomics, Genomics, and Epigenomics

16) Structural and Functional Connectomics

17) Robotics and Brain-Machine Interfaces

18) History, Teaching and Neuro-Ethics
