

# Main Topics

## Symposia Proposals Submissions

## Abstracts

- 1) Nervous system development and related disorders
- 2) Comparative neuroscience and Evolution
- 3) Stem cells, organoids, neural injury neurotoxicity and repair
- 4) Neurons and Glia: physiology and inter-cell communication
- 5) Neuroimmunology
- 6) Neural Excitability, Synapses and Plasticity
- 7) Aging and Neurodegenerative Disorders
- 8) Diseases of the nervous system (including, infective and psychiatric)
- 9) Motor and Sensory Systems
- 10) Sleep, Biological rhythms
- 11) Neuroendocrine systems
- 12) Computational Neuroscience
- 13) Emotion, Memory and Cognition
- 14) Neuroethology
- 15) Transcriptomics, genomics, and epigenomics
- 16) Structural and functional connectomics
- 17) Robotics and Brain-machine interfaces
- 18) History, Teaching and Neuro-ethics
