**The final selection of the top three winners will be determined in real-time during the forthcoming NeuroART Award ceremony during #IBR02023.**

Your presence is invaluable, and we cordially invite you not to miss this incredible event!

# **We eagerly anticipate your participation and look forward to meeting you in Granada!**

**Wednesday, 13 September, 12:10-13:40**

The **International Brain Research Organization (IBRO)** in collaboration with the **Spanish Society of Neuroscience (SENC)** is delighted to announce the **NeuroART IBRO-SENC 2023, a competition with images related to neuroscience**. The thematic is free, though normally related to lab events. Let your imagination run wild and show the artistic world behind neuroscience!

## **Benefits and awards**

All benefits/awards will be given to the main applicant and not to the additional contributing authors but all authors will be mentioned in the awarded certificates.

### **Before the IBRO 2023 World Congress:**

- Images/videos will be used in the IBRO and SENC social media.

### **During IBRO 2023 World Congress:**

- 'Live' images/videos will be displayed on the screens of different rooms during breaks. They will also be used at IBRO and SENC social media.
- Images will be displayed in panels in the posters area. Each applicants will received the corresponding panel at the end of the conference.
- The 12 pre-selected candidates will receive an award certificate during the NeuroART Awards Ceremony. The 3 winners will receive a distinction.
- Awarded images (3 images) will be used as covers for IBRO Journals (IBRO Neuroscience and IBRO reports).
- The three awarded images will be given a 250€ prize.
