

# Organisers

IBRO is the global association of neuroscience societies established in 1961 that aims to promote and support neuroscience around the world through training, education, research, outreach and engagement activities, and the publication of two journals, Neuroscience and IBRO Neuroscience Reports. More than 90 international, regional and national scientific members constitute IBRO's Governing Council which, together with the IBRO Executive Committee and five Regional Committees, address the needs and advance the work of individual scientists and research communities everywhere. In addition, IBRO has partnerships with like-minded scientific organizations to identify priorities and help bridge gaps in knowledge, investment and resources in the field of brain research.

## **The IBRO Mission is to:**

- develop, support, coordinate and promote scientific research in all fields concerning the brain
- promote international collaboration and exchange of scientific information on brain research throughout the world
- provide for and assist in education and dissemination of information relating to brain research

The Spanish Society of Neuroscience (SENC) brings together scientists working in the field of Neuroscience in Spain.

## **The objectives of the SENC, the Spanish Neuroscience Society, are:**

- Promote the development of knowledge in the area of Neuroscience, bringing together scientists from different disciplines, and facilitating the integration of research aimed at all levels of nervous system organization.

- Promote education in the field of Neuroscience.
- Promote the relationship with national and international homologous societies and organizations.
- Inform the public about the results and implications of ongoing research in the areas of Neuroscience.
